From: James Meyer
Meteorologist In Charge
WFO Omaha/Valley - Valley, Nebraska

Subject: Change in flood stage on the Elkhorn River at Neligh

...At Neligh affecting Antelope county...

On March 14th 2011, minor, moderate and major flood stages will change. The new flood stages are as follows:

Minor Flood Stage = 11 feet
Moderate Flood Stage = 12 feet
Major Flood Stage = 14 feet

This change in flood stage is the result of the reporting site moving upstream about one mile. The new flood stages correlate to the same levels that were used at the old observing site.

Real-time data and forecasts are available on the internet at:
